

REMARKS

Applicants respectfully request reconsideration of the present application in view of the above amendments and the following remarks. Claims 1-20 are currently pending in this application, of which claims 1 and 11 are independent. In the Office Action dated April 24, 2008, the Examiner rejected claims 1-20 under 35 U.S.C. §103(a) as being anticipated by U.S. Patent Publication No. 2005/0114778 ("Branson") in view of U.S. Patent No. 5,995,101 ("Clark").

Applicants' undersigned representative conducted an interview with the Examiner on June 24, 2008. Applicants would like to thank the Examiner for the courtesy extended during the interview in which the above claim amendments were presented and discussed. The Examiner acknowledged that if independent claims 1 and 11 were to be amended as presented above, amended claims 1 and 11 and their respective dependent claims 2-10 and 12-20 would overcome the current rejection under 35 U.S.C. §103(a) over *Branson* and *Clark*.

More specifically, the Examiner stated that the combination of *Branson* and *Clark* at least fails to show or suggest automatically providing "a second portion of the structured database information and the options relating to the event through an enterprise solution portal that accesses the second portion of the structured database information in a remote enterprise database when the application local to the user's computer is determined as being insufficient to address the second request for additional structured database information and to provide the options relating to the event," as recited in amended independent claims 1 and 11.

Accordingly, Applicants submit that this claimed invention, as amended, is neither anticipated nor rendered obvious in view of the prior art references cited against this application. Applicants therefore request the Examiner's reconsideration and reexamination of the application and the timely allowance of the pending claims.
